InterPARES 3 Case Study Abstract

TEAM Brazil – Case Study no. 03

Test-bed name: *State University of Campinas (Unicamp)'s Radio and Television.*

Test-bed type: *University archive (Autonomous state authority).*

Topic/Title: *Digital audiovisual records: TV programs.*

Case study type: *Records.*

Start date: *July 2008.*

The test bed is the State University of Campinas (Unicamp)'s Radio and Television (RTV/Unicamp), responsible for the creation, management and storage of the TV programs, whose objective is to broadcast the content of the university's scientific and cultural production.

The programs are maintained by the department of archives and documentation, which receives the material on DVCAM master tapes, carries out the duplication process to DVD, classifies the material in a system and stores it in repositories.

They are digital records that have to be kept over time in a reliable, legitimate and accessible way. As part of the InterPARES Project, this study aims at the improvement of management and preservation procedures of audiovisual records.
