International Research on Permanent Authentic Records in Electronic Systems

TEAM Brazil

InterPARES 3 Case Study Abstract

TEAM Brazil – Case study 04 - Library Network of the State University of Campinas – Digital Master's Dissertations and PhD Theses.

Test-bed name: *Library Network of the State University of Campinas – Digital Master's Dissertations and PhD Theses.*

Test-bed type: *state university archive (autonomous state authority).*

Topic/title: *Digital Master's Dissertations and PhD Theses.*

Case study type: *Record*

Start date: *May 2008.*

The test-bed concerns the Digital Library (a corporate system enabling the recording, reporting and access to documents), hosted by the Library Network of the State University of Campinas (Portuguese abbreviation: SBU) and established on November 8, 2001, which provides public access to dissertations and theses resulting from postgraduate courses in the university.

The case study examines the digital dissertations and theses that have been included in the Digital Library. They are trusted copies of the original paper documents and thus must be kept authentic and accessible to users through time.

This case study aims at setting up managing and preserving procedures, relating to the repository of documents in the Digital Library.
